*Election/Restrictions*

Pursuant to 35 U.S.C. 121 and 37 C.F.R. 1.141, the antisense sequences listed in claims 1, 5, 10, 16, 17, 18, and 19 are subject to restriction. The Commissioner has partially waived the requirements of 37 C.F.R. 1.141 and will permit a reasonable number of such nucleotide sequences to be claimed in a single application. Under this policy, up to 10 independent and distinct nucleotide sequences will be examined in a single application. (see MPEP 803.04 and 2434). Although Office actions have been previously issued in this application, applicants newly added claim material has never been specifically examined; thus the inclusion of said material necessitates the instant restriction requirement.

Claims 1, 5, 10, 16, 17, 18, and 19 specifically claims methods of using sequences that are antisense to and target SEQ ID NOS 2-4, 7-11, 13-24, and 27-46, to modulate the expression of MDM2. Although said antisense sequences each target and modulate expression of the same gene, the instant antisense sequences are considered to be unrelated, since each antisense sequence claimed is structurally and functionally independent and distinct for the following reasons: each antisense sequence has a unique nucleotide sequence, each antisense sequence targets a different and specific region of MDM2, and each antisense, upon binding to MDM2, functionally modulates (increases or decreases) the expression of the gene and to varying degree (as evidenced in figure 9B of the disclosure). Furthermore, a search for methods of using more than one (1) of the antisense sequences claimed in said claims presents an undue burden on the Patent and Trademark Office due to the complex nature of the search and corresponding examination of more than one (1) of the claimed antisense sequences. In view of the foregoing,

Art Unit: 1635

one (1) antisense sequence is considered to be a reasonable number of sequences for examination. Accordingly, applicants are required to elect a method of using one (1) of the antisense sequence from any of the above listed claims.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

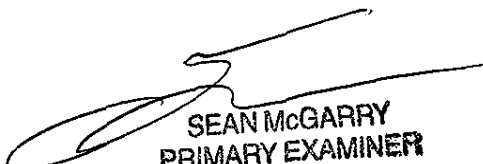

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
